

Have you been denied insurance coverage for a GLP-1?

Scan the code to submit a Public Comment to CMS in Support of Expanding Coverage for Obesity Medications

In November, the Centers for Medicare and Medicaid Services (CMS) announced a Proposed Rule that would expand coverage for obesity medications under Medicare and Medicaid. There is a 60-day public comment period that allows individuals to submit feedback on the Proposed Rule.

Why YOU should submit a Public Comment:

- Public comments play a crucial role in shaping policy by making voices heard and contributing to meaningful change.
- OAC advocacy efforts have been instrumental in reaching this significant milestone.
- Your voice can help ensure access to obesity care for millions of Americans.
- **Medicare and Medicaid coverage policy sets the standard for other insurers, both private and public.**

We encourage individuals living with obesity, healthcare providers and organizations to submit comments on the Proposed Rule by January 27th at 5 PM.
