- Hispanic: 26.2%
- White: 16.6%

Healthcare costs are 34% higher for people with obesity.

Healthcare coverage for obesity and weight management is inadequate and insufficient, and varies significantly by each health plan.

OAC’s Beliefs and Demands

OAC BELIEVES THAT obesity is a complex chronic disease, not a matter of personal choice or moral deficiency.

OAC DEMANDS THAT people who are affected by obesity deserve access to affordable, individualized medical coverage for science-based treatments in the same way other chronic diseases are managed, and to be treated with the dignity, respect, and equality that is offered to their peers.

The Obesity Action Coalition (OAC) exists to serve the needs of and give a voice to the individuals affected by the disease of obesity while helping them along their journey toward better health through education, advocacy and support.
